1. From Triangle to Circle: Collective Problem Solving

PERFORMANCESTAT 1.0
(EX: BALTIMORE CITISTAT)
EXECUTIVE'S OFFICE

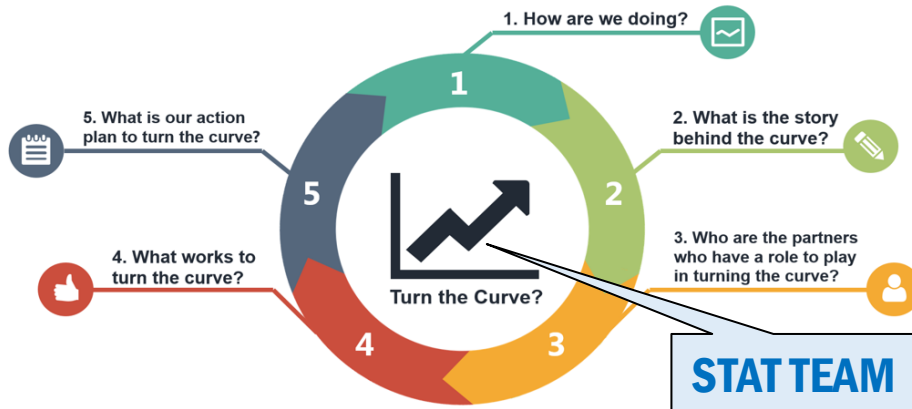

PERFORMANCESTAT 2.0
(EX: MARYLAND STATESTAT)

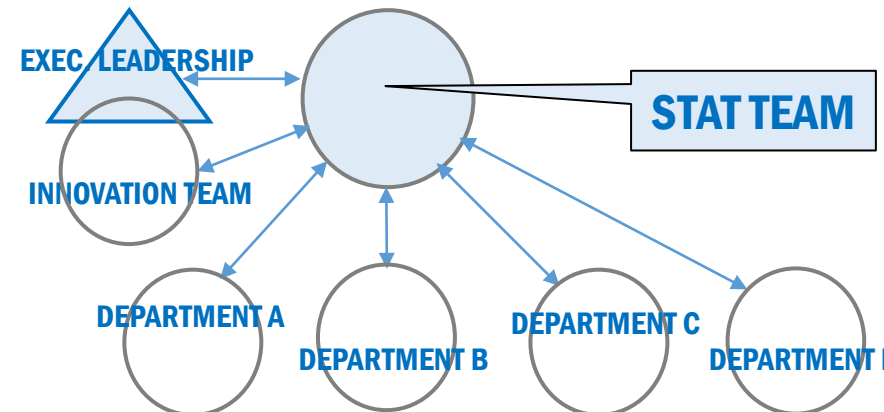

Gov. O'Malley describes Baltimore CitiStat as "primarily the meeting of two bureaucratic hierarchies: The Mayor's command staff and the various Department command staff"—what he calls "little triangle questioning big triangle." Some have referred to this style as "ToughStat."

With StateStat, Gov. O'Malley instead sought to adopt a model of "little circle in the center of several larger circles all around," by focusing StateStat on cross-functional challenges, like jobs for veterans and reducing child hunger.

PERFORMANCESTAT 3.0
(EX: MONTGOMERY COUNTYSTAT)
A HYBRID "TURN THE CURVE" APPROACH THAT EMPHASIZES ACCOUNTABILITY AND COLLECTIVE LEARNING

PERFORMANCESTAT 4.0?
(EX: MONTGOMERY COUNTYSTAT)
A MORE "DISTRIBUTED" MODEL IN WHICH DEPARTMENTS ALSO HAVE SKILLED ANALYTICAL CAPACITY WITHIN THEM

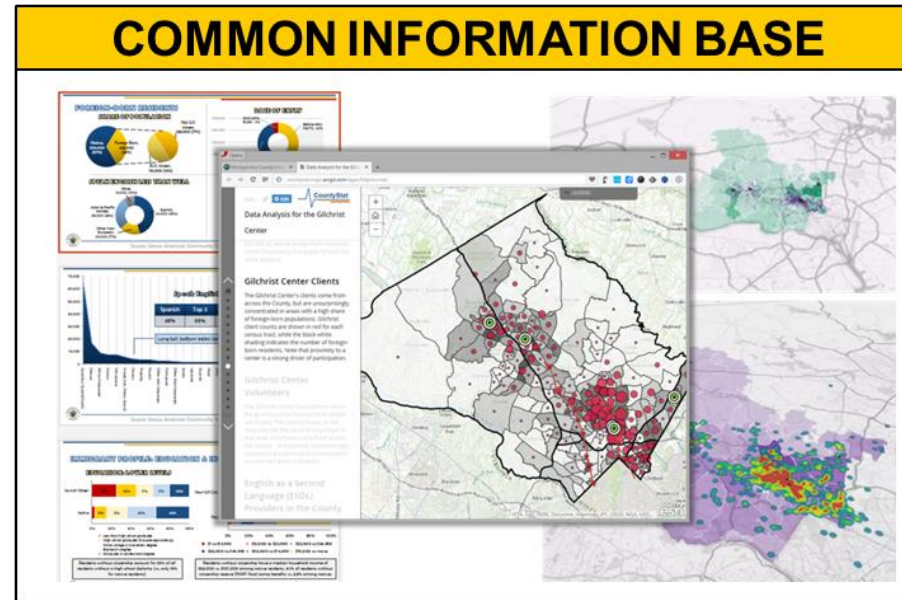

In a 2019 administration change in Montgomery County, there was a return to recurring department-focused performance meetings, but with the focus on applying a structured "Turn the Curve" problem-solving methodology that allows for a deeper understanding, identifying and enlisting partners, adopting best practices, and course-correction as needed.

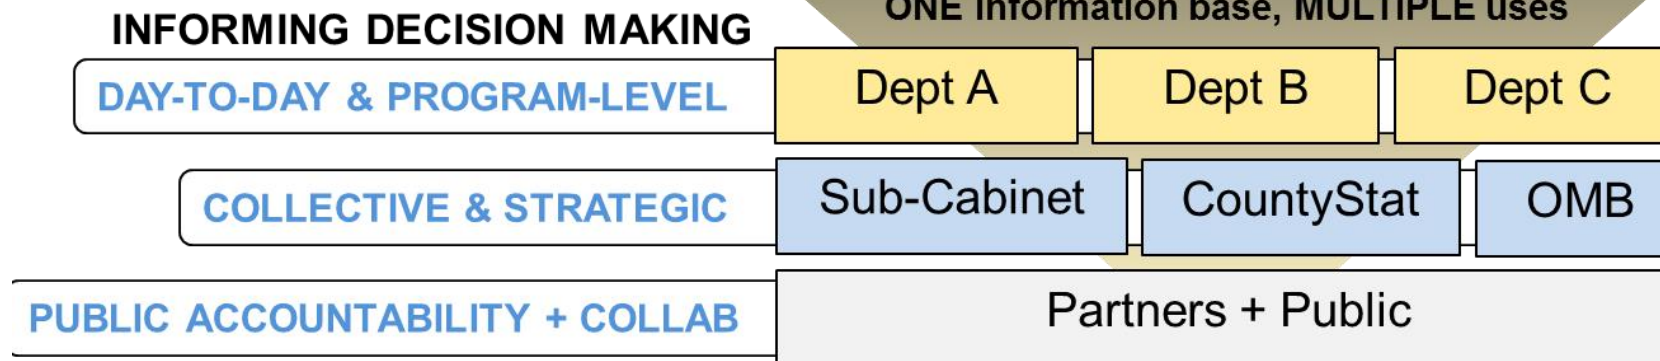

At the same time, there has been a gradual shift to a more "distributed" model in which departments are seeking to hire skilled data analysts of their own.

2. Beyond PowerPoint: Interactive, Reusable Insights

CountyStat is making use of its new toolset to build out internal and external dashboards, maps, and other reusable products for cross-cutting initiatives

ONE information base, MULTIPLE uses

NEW FOCUS: AUTOMATION & REPRODUCIBILITY—will enable CountyStat analysts to spend more time on value-adding activities (rather than repetition) and will make it easier to “operationalize” analysis into day-to-day decision making of departments.

One information base, many applications.

Example 1: Interactive maps of the County’s immigrant community were initially developed for the Gilchrist Center but are now also used by the Regional Services Centers, Literacy Council, Libraries, HHS, MCAEL, Montgomery College, and a number of external partner organizations.

Example 2: The County’s FoodStat initiative to combat food insecurity required developing a StoryMap to visually convey data about food demand and supply for the most vulnerable County residents. Our Director of OEMHS remarked how he needs to understand the characteristics of the same population but from a public safety standpoint. The StoryMap was then made more generic and interactive to suit multiple needs.

3. Fit-for-Purpose: Tailoring Approach to Levels of Performance

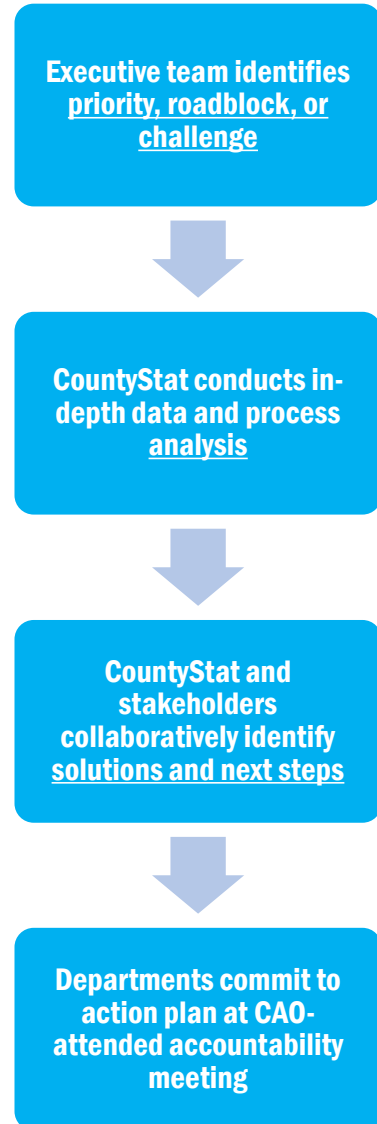

Different stages of progress call for different approaches.

As a relatively high-performing government, a traditional “command and control” approach is not likely to be the most effective in driving continuous improvement (in most cases).

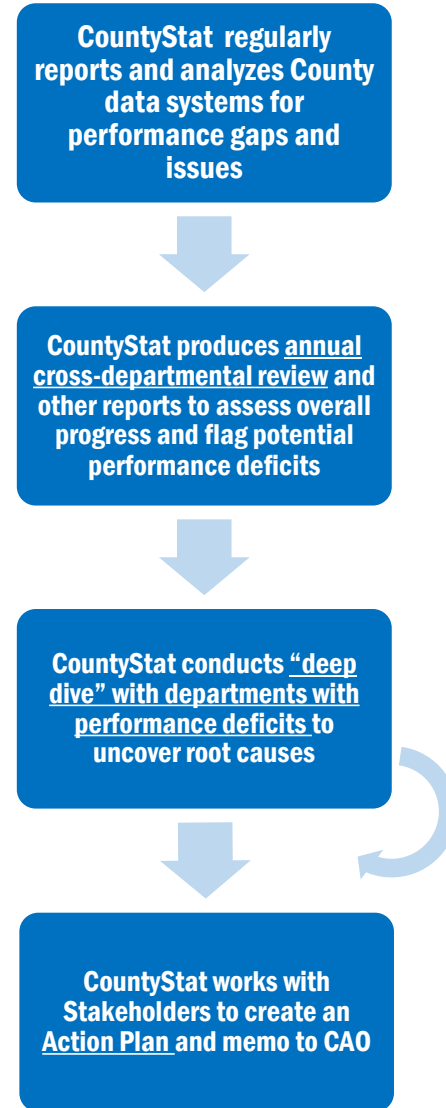

| FROM | TO | APPROACH |
|----------|----------|---|
| AWFUL | ADEQUATE | Apply “shock therapy,” top-down “command and control,” and prescriptive solutions |
| ADEQUATE | GOOD | Adopt best practices and well-defined routines, structures, and systems |
| GOOD | GREAT | Provide the tools for shared ownership, collaboration based on trust, and a relentless focus on continuous learning and improvement |

How CountyStat Executes Performance Improvement

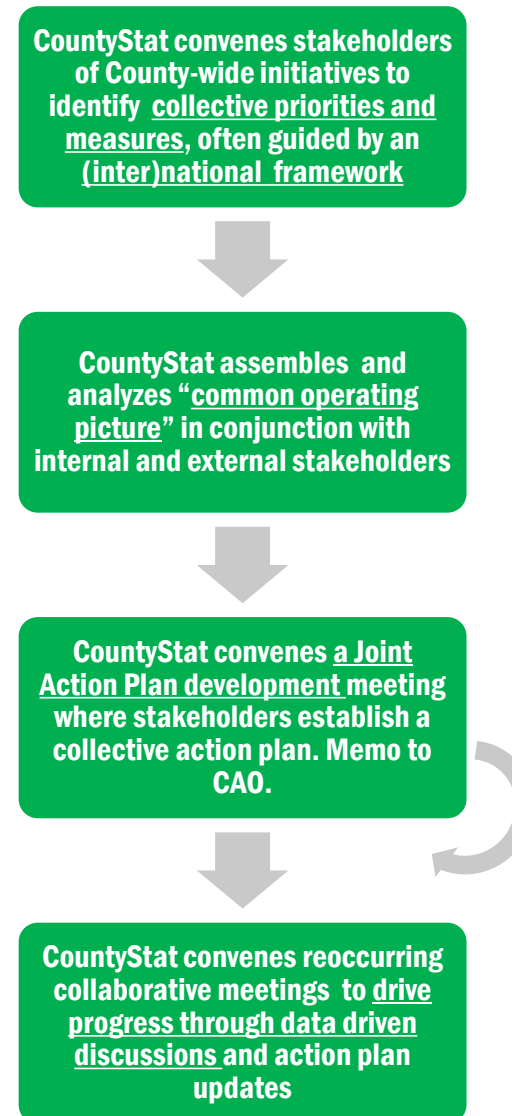

Executive-Driven

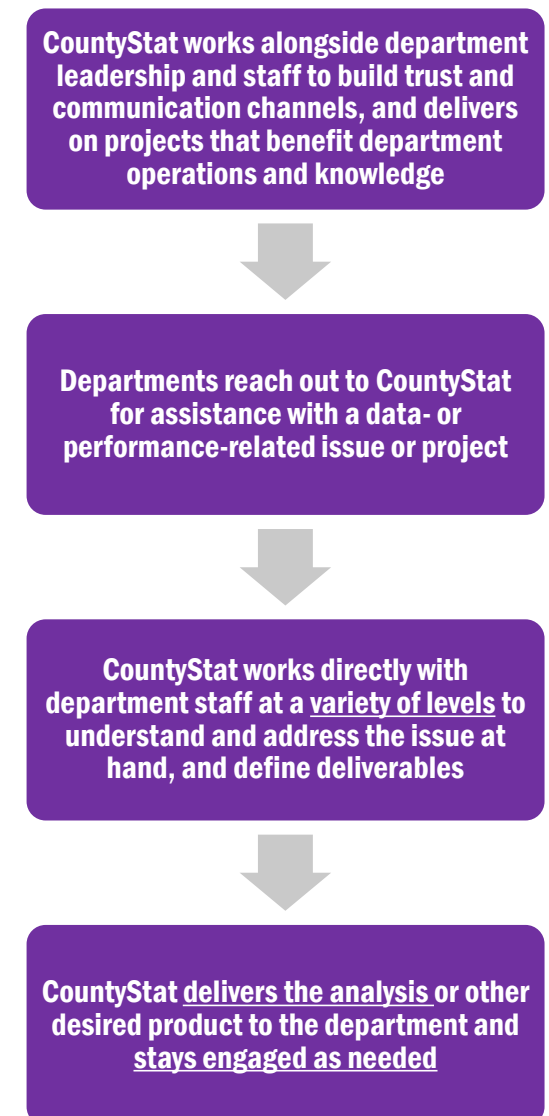

Data-Driven

Collaboration-Driven

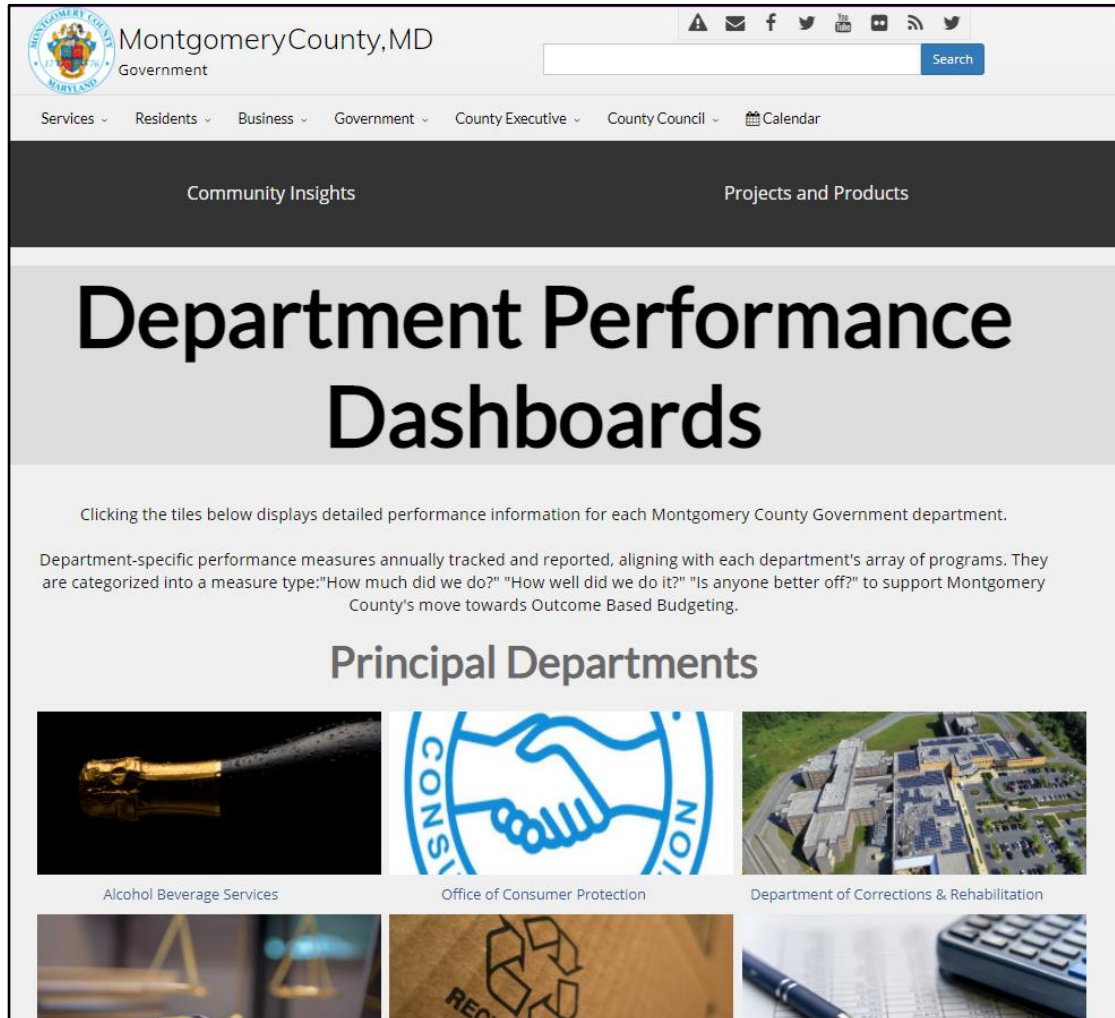

Department-Driven

DUAL FOCUS: OVERSIGHT VS. SUPPORT

Department Performance Dashboards

Clicking the tiles below displays detailed performance information for each Montgomery County Government department.

Department-specific performance measures annually tracked and reported, aligning with each department's array of programs. They are categorized into a measure type: "How much did we do?" "How well did we do it?" "Is anyone better off?" to support Montgomery County's move towards Outcome Based Budgeting.

Community Insights

Community Dashboards

Our community dashboards bring together internal administrative data, public data, and data from our network of partners to assist Montgomery County and its partners in: tailoring programs to local conditions in an increasingly diverse County; improving outreach to under-served populations; and meeting the individual needs of all our residents and businesses.

Department of Transportation

What the Department Does and for Whom

Provide an effective and efficient transportation system for the movement of persons and vehicles on County roads; plan, design, and coordinate development and construction of transportation and pedestrian routes; operate and maintain the traffic signal system and road network and develop and implement transportation policies.

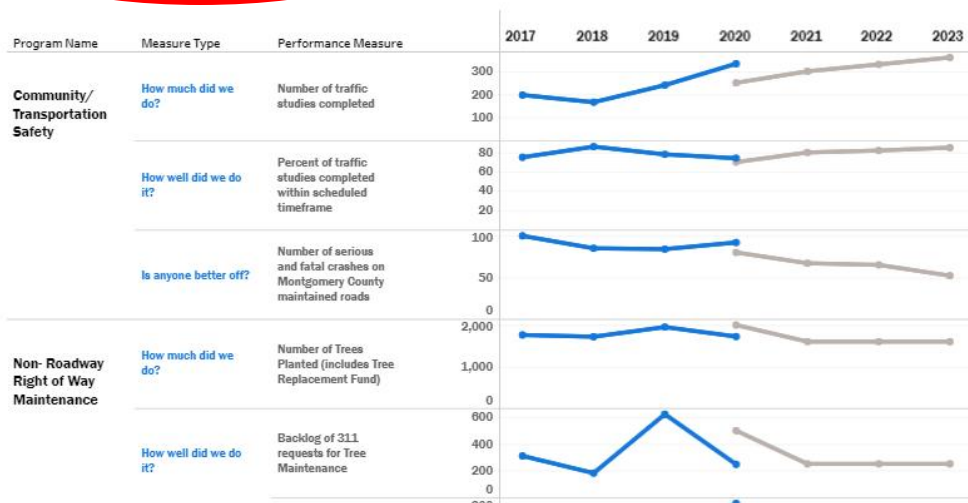

Department Performance Measures

Montgomery County departments are broken out into discrete programs for the purposes of Outcome Based Budgeting. A program is an activity or set of activities performed by County government that has:

- identifiable costs for budgeting purposes
- a clear public purpose and measurable results, and
- clear lines of accountability for its performance and financial management

The following are the performance measures for programs within the Department of Transportation. In our performance framework there are three categories of measures:

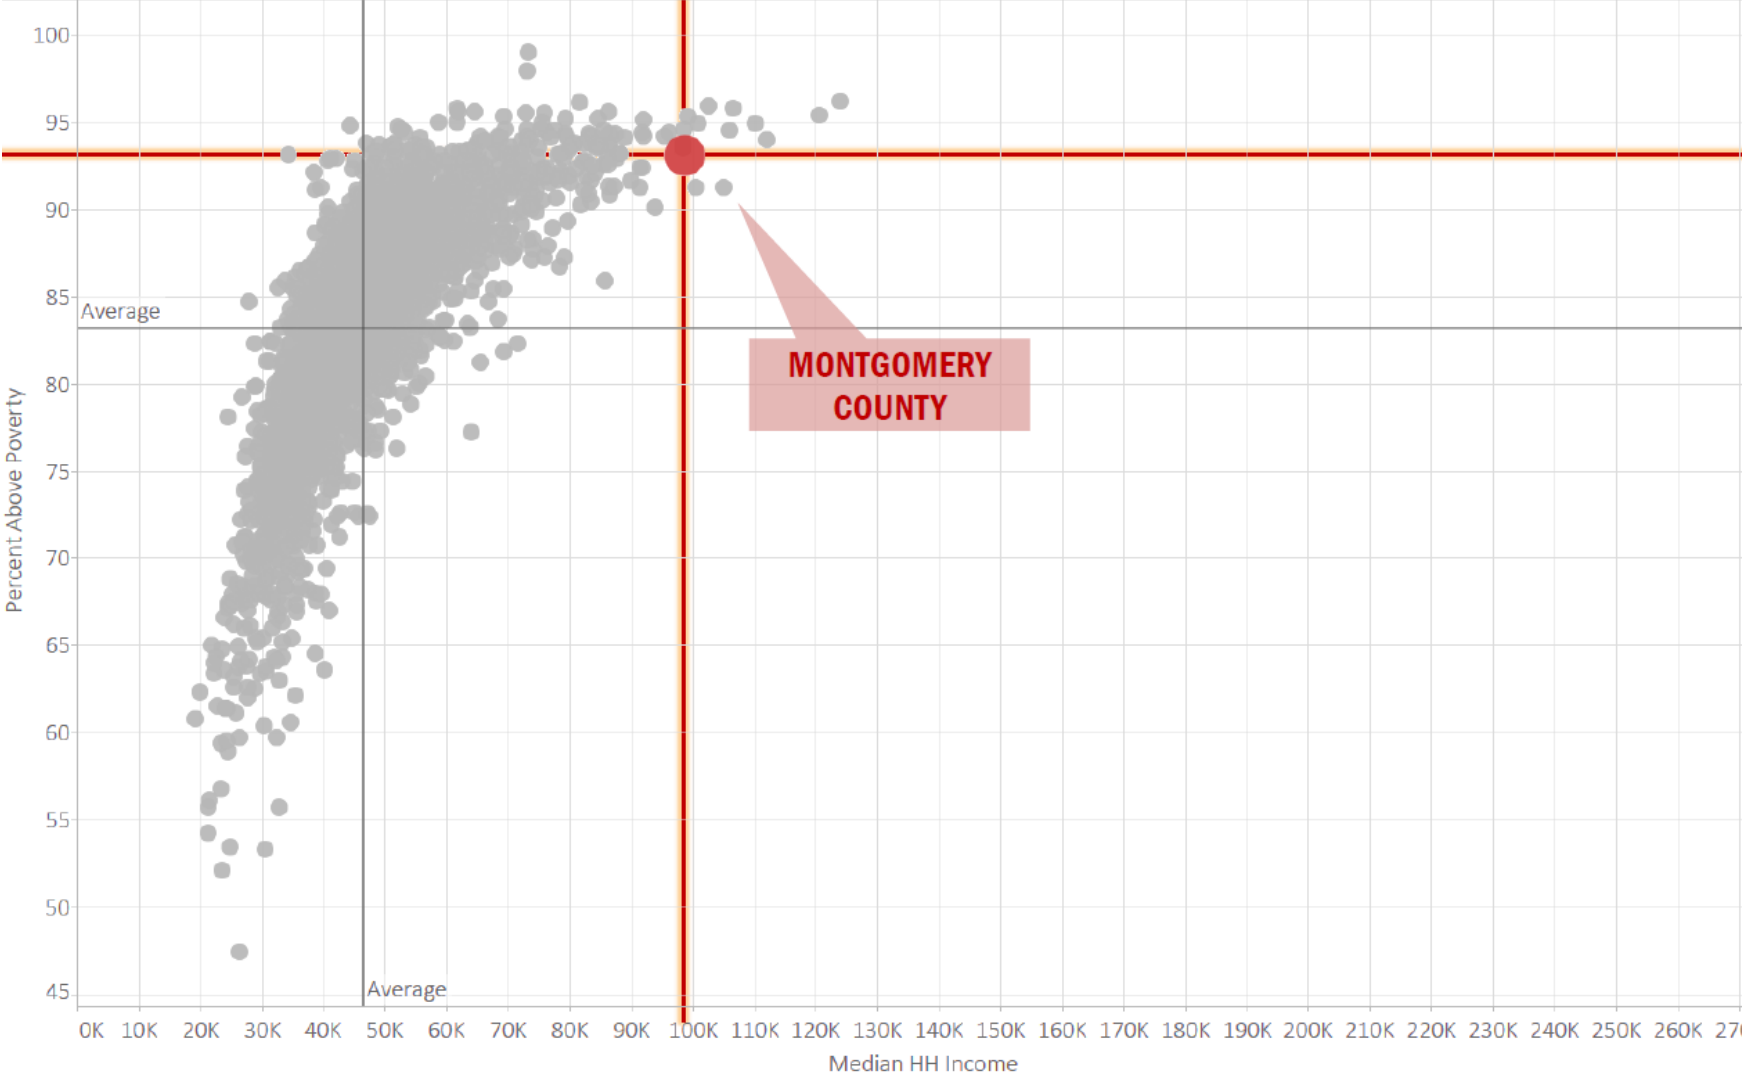

- How much did we do? (quantity)
- How well did we do it? (quality)
- Is anyone better off? (effect or impact)

Performance Measures Classification

MONTGOMERY COUNTY VS. ALL COUNTIES (1/3)

THIS CHART MAPS OUT MEAN HOUSEHOLD INCOME VS. THE POVERTY RATE FOR ALL COUNTIES IN THE USA. (MONTGOMERY COUNTY IS IN RED).

NOTE THAT MONTGOMERY COUNTY HAS AN INCOME LEVEL THAT IS AMONG THE VERY HIGHEST IN THE NATION, WHILE OUR POVERTY RATE IS RELATIVELY LOW.

...BUT IT IS IMPORTANT TO REMEMBER THAT THESE NUMBERS ARE COUNTY-WIDE AVERAGES THAT DISGUISE TREMENDOUS DIVERSITY IN INCOME AND POVERTY IN THE COUNTY.

SOURCE: CENSUS ACS 2010-2014

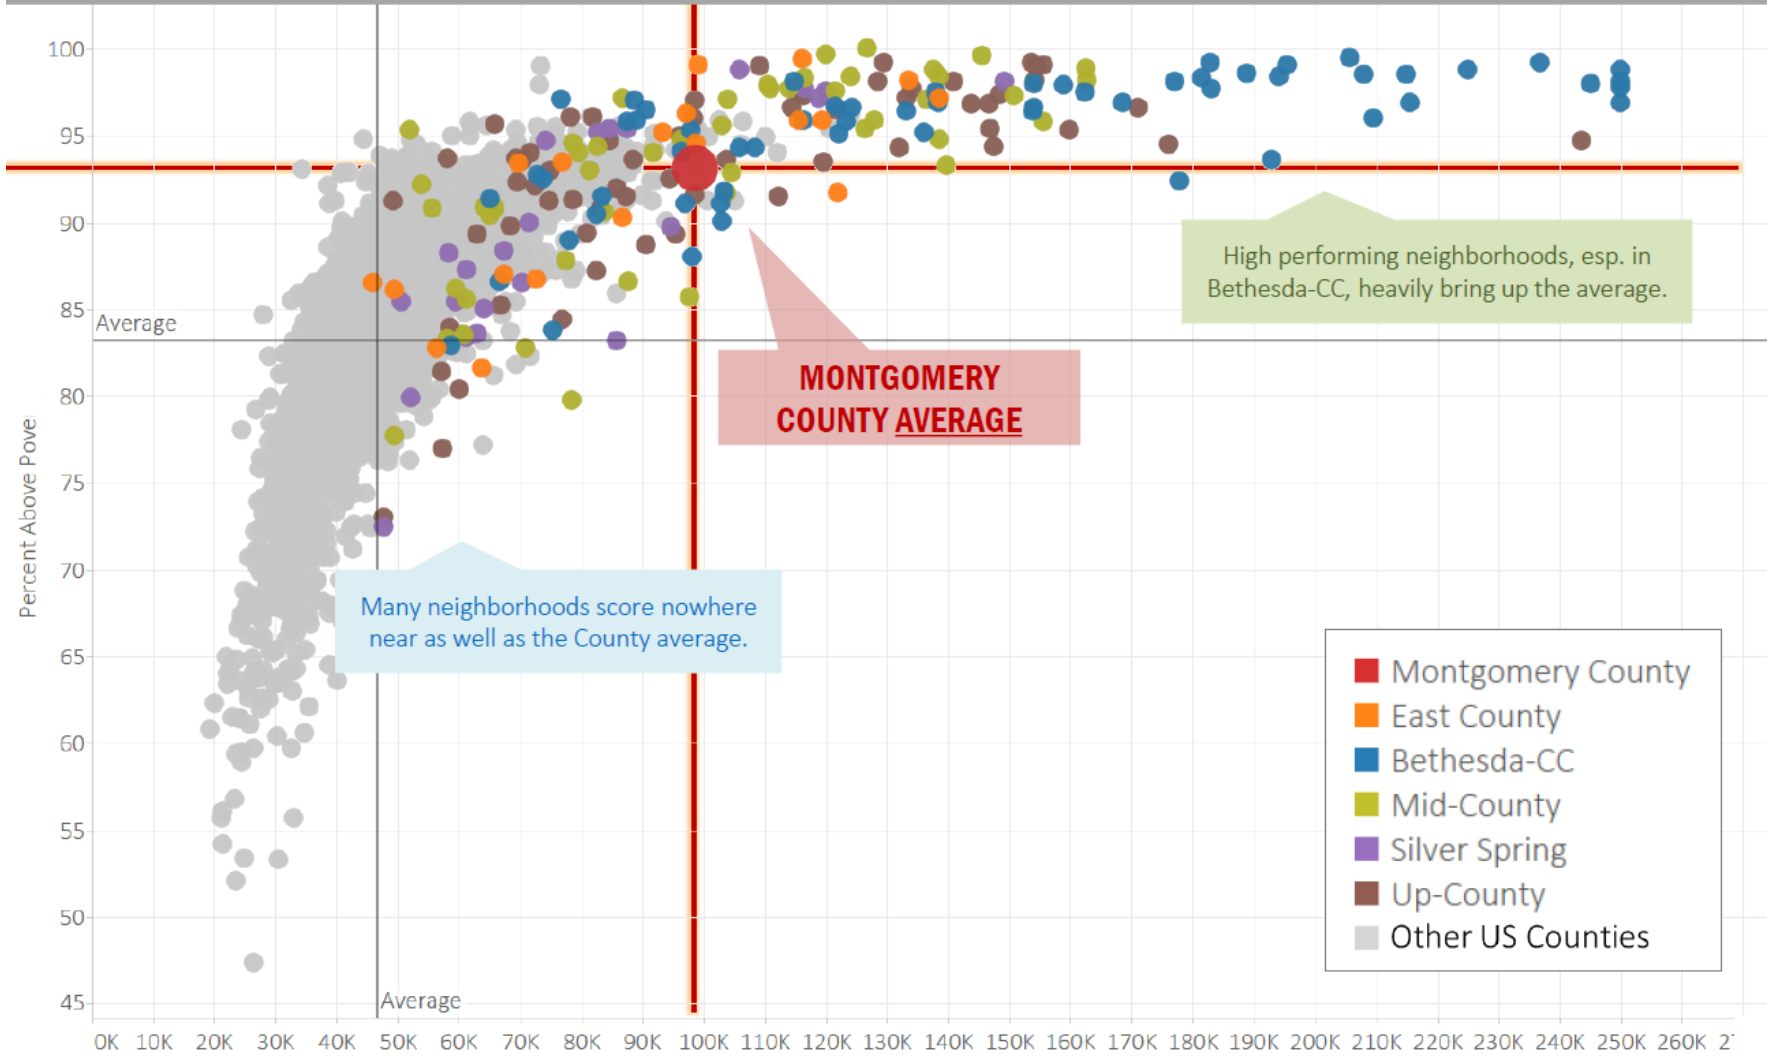

UNPACKING THE AVERAGE: DATA BY MONTCO CENSUS TRACT (2/3)

Census breaks down Montgomery County into 215 Neighborhoods

- Montgomery County
- East County
- Bethesda-CC
- Mid-County
- Silver Spring
- Up-County

UNPACKING THE AVERAGE: DATA BY MONTCO CENSUS TRACT (3/3)

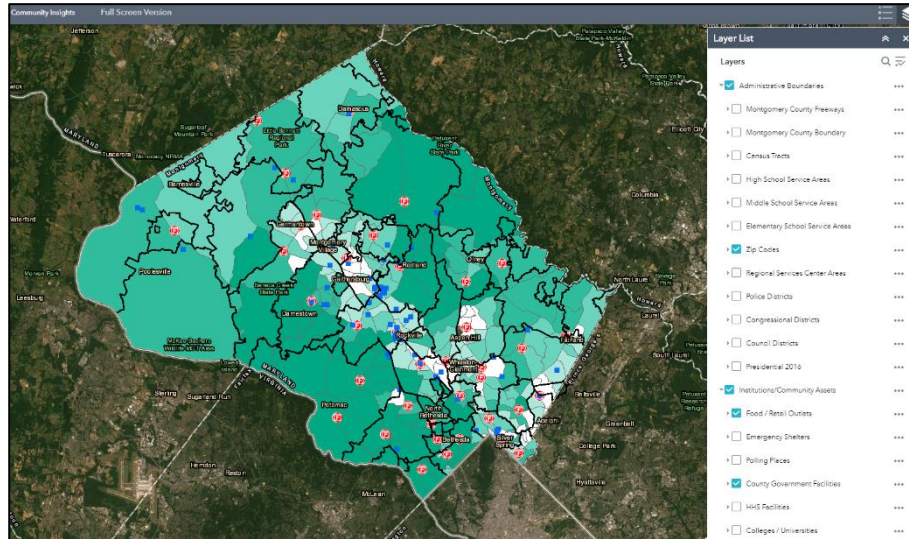

THIS CHART “UNPACKS” THE DIVERSITY IN INCOME AND POVERTY IN THE COUNTY BY ADDING A DOT FOR EACH OF THE 215 NEIGHBORHOODS (“CENSUS TRACT”) IN THE COUNTY AND THEN COLOR CODES THEM BY COUNTY REGION.

SOURCE: CENSUS ACS 2010-2014

1. Show the Data, and leave out unnecessary info and elements
2. Reduce the clutter
3. Integrate graphics and text, using more active titles, labels, and annotations
4. Use “small multiples” – breaking out your data into chunks, instead of one large graph make several smaller ones
5. “Start with grey” then decide which pre-attentive attributes to use
